

COPILOT ORIONLED

LED Light

With the LED light system **COPILOT ORIONLED** a more homogeneous light distribution is achieved, even at lower intensities. With the adjustment of intensity, the stress in the animals is reduced which allows **lower mortality rates**, **higher weight gain** and **good feed conversion rate**.

FEATURES

- Lamps with cooling gel that allow to always work at the right temperature, even at low intensity.
- Completely smooth to make cleaning easy.
- **Lamps technical data.**

| | |
|---------------------------|---------------|
| Power consumption: | 14W |
| Light output: | 1400+ Lumen |
| Power factor: | 0,925+ |
| Power supply: | 220-240V 50Hz |
| Light colour: | 2700k |
| Lamp base: | E27 |

SYSTEM

- **A durable system**
The LP360 dimmer switch keeps the lamps at a controlled and stable current intensity, guaranteeing their durability. A single dimmer per house: allows to regulate up to 200 OrionLED lamps.
- **Protection IP65**
This system consists of a VLU base including full support for threaded bulb, a 14W OrionLED lamp and a threaded short cover. The set is completely waterproof which allows to clean the house using pressurised water.

BENEFITS

- **Lower energy consumption** due to its high efficiency. Fewer lamps per house than with monochromatic systems.
- **Lámparas estancas:** alta resistencia a entornos hostiles (amoníaco, polvo y agua).
- **Progressive adjustable intensity:** by a 0-10V input it allows to regulate light intensity from 2% to 100%.
- **Homogeneous light** with a warm White colour (2700k)

THE BEST LIGHTING SELECTION FOR YOUR FARM
