

COPILOT SOL COMBITERM

Indirect Fired Gas Air Heater

Gas heater **COPILOT SOL CombiTerm** warms directly the air of the poultry house without introducing combustion gases inside it, thanks to its **indirect fired system**. With a wide range of options, it can be mounted both inside and outside the poultry house.

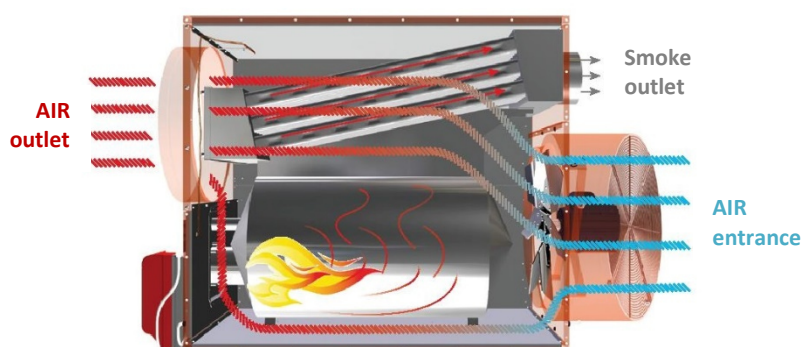

FEATURES

- Combustion chamber made of **stainless steel**..
- **High-quality built-in** electronic components.
- **Water-proof** control box.
- **No exhaust gas emissions inside the poultry house, low CO₂ content.**
- Control possible via **central control unit** or via **thermostat**.
- Fully **automatic** device with **electrical ignition**.
- Low-maintenance **burner**.
- **It can be mounted both inside and outside the poultry house.**
- **No steam is released: drier air.** There is no increase in humidity. **Improvement of bedding quality: drier bedding.**
- **Improvement of the quality of the environment.**

TECHNICAL DATA

Model	100E	
Gas type	Gas Natural	LPG
Heat Power	95 kW	
Consumption	10,1 m ³ /h	7,5 kg/h
Air flow	8.200 m ³ /h.	
Protection level	IP55	
Electrical connection	400 V / 50 Hz 3F	
Electrical power	1,3 kW	
Noise level	68 dB(A)	
Dimensions	1681 x 672 x 1046 mm	
Weight	201,5 Kg.
