

COPILOT SOL GO

Indirect Combustion Gas Generator

The **COPILOT SOL GO** gas generator directly heats the air in a livestock house without introducing combustion gases into it, thanks to its **indirect combustion system**.

FEATURES

- Internal and external structure in **stainless steel**.
- Independent automatic burner.
- Available in Diesel, Propane and Natural Gas
- **Compact**, but at the same time **easy to inspect** thanks to the special burner access solution.
- Control can be carried out by a **central control unit** or by a **thermostat**.
- Fully **automatic** with electric ignition.
- **Equipped as standard with a snorkel connection**, it takes in air from the outside that is completely clean, avoiding dirt on the burner, increasing the performance of the generator, allowing its useful life to be extended.
- It can also be used as a fan in the warmer months thanks to the winter-summer switch.

ADVANTAGES

- **Improvement of the quality of the environment.**
- **No toxic gases are emitted** inside the building: **zero CO2 emissions** from the heating.
- **No water vapour is released: drier air.** There is no increase in humidity.
- **Improved bed quality: drier bedding.**

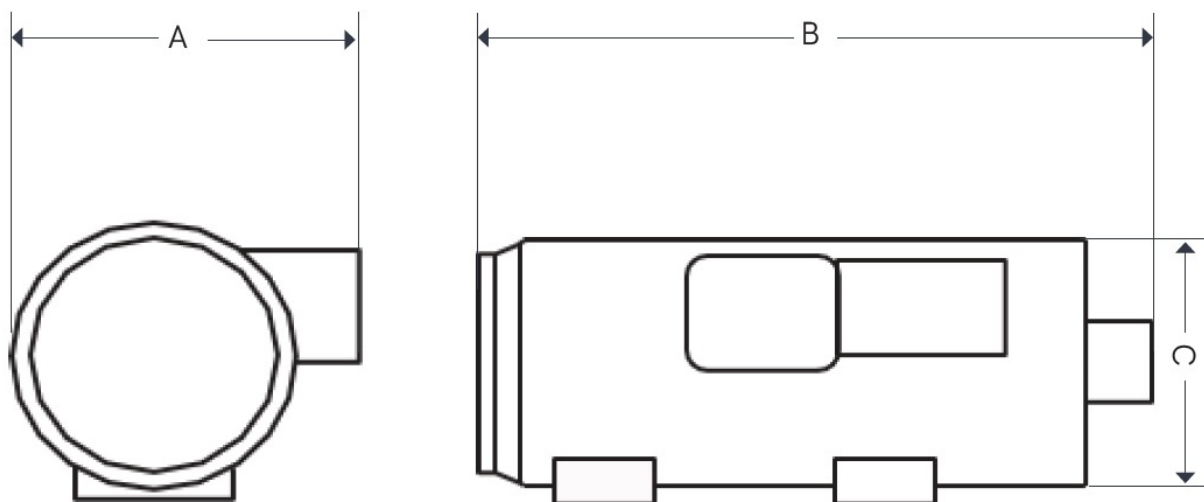

CONSEQUENCES:

- **Increased humidity control.**
- **Reduced air renewal.**
- **Reduced fuel consumption.**

TECHNICAL DATA

The **COPILOT SOL GO** gas generator can run on **Diesel, Propane** or **Natural Gas**.

Model	Uts.	GO 50			GO 100		
Gas		Diesel	Natural Gas	Propane	Diesel	Natural Gas	Propane
Thermal power	kW	49,80	50,08	49,98	99,80	94,63	97,89
Air Flow	m3/h	4100			7500		
Consumption	kg/h	3,94	-	3,67	7,9	-	7,12
Consumption	m3/h	-	4,554	1,83	-	8,684	3,549
Gas Pressure	mbar	-	20,00	30/37	-	20,00	30/37
Power consumption	W	750	800	800	1000	1200	1200
Electrical connection		230V / 50 Hz			230V / 50 Hz		
A	mm	1379			1781		
B	mm	690			831		
C	mm	630			776		
Weight	kg	75			135		

A wide range of installation and ducting accessories is available upon request.
